

WW VesselWatch

INTELLIGENT RADIO SYSTEMS

Optimised Guest Service

Improving your on-board experience and delivering an exceptional level of service, enhancing and integrating with your vessels hospitality needs.

Discreet, non-obstructive requests, sent directly to the crew radios at the touch of a button.

No compromise, send service requests the way you choose. Radio, smart phone, iWatch, service button and more. **VesselWatch** can integrate and unify them all.

Intelligent message delivery and response. Requests are sent to the most suitable crew member for the swiftest reply. Confirming when a request has been handled, improving efficiency and ending duplicate service responses.

Supercharge your Two-Way Radio

Easily integrating with all of your vessels systems, intelligently transmitting service requests to the most suitable radio

Crew Call Application

Transform a smart phone or tablet into a crew call button and conjure a crew member in an instant. One touch sends an immediate service request, once the crew accept the call, instant confirmation is sent to show whom is responding to the request.

iWatch Service Call

Simply satisfy your every request through your iWatch. Using the latest cutting-edge technology to convert your voice to text and then relaying the message to the crew radios in an instant.

Total Control Of Your Service Requests.

All messages can be handled differently – distributed to the most appropriate radio/group, for the quickest response.

Effortless Integration

VesselWatch can unify your on-board AV and guest service call buttons, to provide a heightened experience with the minimum of disruption.

Discreet One Touch Ordering

One click, fast ordering for most commonly requested items, such as iced water, olives and peanuts.

Smart Menu

Guests can browse bespoke menus on their tablet, phone or AV system and order food and drink at the press of a button. This clever application sends the order to the bar or kitchen, also contacting a steward for delivery.

Expertise That You Can Trust

We are communications experts, a team of designers and engineers with a passion for creating systems that make your life easier.

Developers of the first wireless BNWAS system, we have over 3500 solutions improving safety and efficiency on vessels worldwide.
